

INTEGRATED CLEANROOM & LABORATORY SOLUTIONS

All Modular Pre-Engineered Cleanrooms

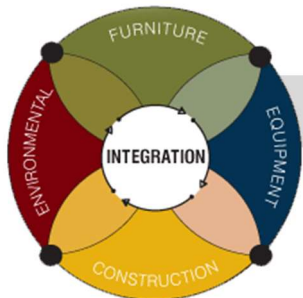

Pre-engineered models are designed to meet industry standards and guidelines.

Modular facility design consists of a two room configuration consisting of an anteroom for personnel gowning and activity preparations and one clean processing room.

Typical scope includes all modular wall systems with glazing vision panels, integral electrical and data service chases, swing type doors with a range of hardware options, flush walk-on type or structure grid ceiling options with integrated LED type light fixtures and HEPA filtration modules, stainless steel product pass thru chambers, anteroom sink wash station and optional casework configurations.

Optional site services available are: Packaged air handling systems complete with ventilation systems, localized work stations, exhaust systems, electrical and plumbing services.

Consult with our technical sales representative for optional room configurations and proposal options.
